

ALL EMPLOYEE MASK SAFETY

ALL Mask Tips

- Make sure you can breathe through it
- Wear mask when out in public
- Make sure mask covers your nose, mouth and chin
- Masks do not replace social distancing

Cloth Mask Cleaning Tips

- Launder mask after use in washing machine in HOT water using soap that leaves no residue
- Dry on HOT in your dryer
- Laundered and machine dried without damage or change to shape

Cloth face coverings can be fashioned from household items like a bandana or made at home from common materials such as a t-shirt. Cloth face coverings should -

- Fit snugly but comfortably
- Be secured with ties or ear loops
- Include multiple layers of fabric
- Allow for breathing without restriction

Disclaimer for cloth masks:

Masks provided by the Chickasaw Nation Department of Health should not be considered Personal Protective Equipment (PPE). Caution should be used when considering use. This mask is NOT a suitable replacement for N-95 or other surgical masks for healthcare workers. It does not eliminate risk of contracting or exposing others to disease or infection. The design of this mask is not regulated by the U.S. Food & Drug Administration or the CDC, nor has it been evaluated or approved by the National Institute for Occupational Safety and Health or any other regulatory authority.
